This letter is in regard to the APS letter on the reverse side.

On "their Friday filing for a 20% increase", I contacted local city, county and state elected officials for a 20% reduction in my taxes. Needless to say, they declined following the governors' stated position on this suggested means of relief to the voters of the state.

Based on the current news reports, to point at fuel cost as a reason for a price increase is not a believable reason it is an excuse!

To allow APS to meet the future, they do not need to be the one of the large companies that continue to be the only providers of electric power lines in the state, there need to be computation which has been denied in this state by an unrealistic attitude by this commission.

APS is taking advantage of an opportunity to join in the "gogue train" in hopes it will run on a fast track long after the public gets honest and believable answers on issues regarding the truth about demand verses supply from the oil companies.

As noted in the first paragraph of this note, as elected officials, APS should receive a "NO" answer to their request as I did.

APS must, as I do, tighten their belts, manage a little better, and forego some dreams items for future considerations.

Tha(n)k you,
